

CLEARsplint Nightguard

Patient Education

Astron CLEARsplint™

Nightguards made of the Astron material can have a color tint added, if requested. The appliance will still be translucent, but have an added tint.

ADVANTAGES

for both dentist and patient

Dentist

- Astron's flexible CLEARsplint is self-adjusting. This superb accuracy offers the closest fit.
- Better fit reduces post operative chair time
- Dimensional stability means fewer, if any, adjustments
- Composite formulation, a mixture of powder and liquid, can be press-packed or poured
- Ramps and guide planes can be added to reposition the mandible
- Chairside repairs can be made with cold cure acrylics

CLEARsplint™

CLEARsplint is the superior, and optically clear nightguard with **FLEX**

Patient

- Optical clarity, making it nearly invisible while wearing
- Material is stronger with greater stability, which is ideal for bruxism patients
- Amine-free to never yellow
- MMA*-free to eliminate allergy problems
- Self-adjusting when placed in warm water before wearing
- Wearability and patient comfort are rated excellent

* MMA = methyl methacrylate
